

**PERFORMANCE OF THE
INSTITUTION IN 1 AREA
DISTINCTIVE TO ITS
PRIORITY AND THRUST**

7.3.1 Portray the performance of the Institution in one area distinctive to its priority and thrust.

Terna Dental College continuously strives endlessly to impart and promulgate top class training and scientific temperament to the students, making them professionally competent and compassionate healthcare providers and leaders. In testimony to this, T.P.C.T's Terna Dental College organizes a scientific extravaganza in the form of national-level mini-conferences called "VISTAS". The main objective of the VISTAS is to deliver "Academics Par Excellence". The highlights of the vistas organized by various specialties are:

- **Endovista:** This is a 3-day scientific extravaganza that caters primarily to the post graduate students. Experienced clinicians and academicians all over the country come together to deliver exam-oriented lectures and conduct live demonstrations on patients. Panel discussion aimed at clearing the doubts of students is conducted by senior and experience faculty members. Further, these participants are awarded MUHS credit points for the same.
- **Prosthovista:** National-level workshops are arranged for the benefit of postgraduate students and the staff where numerous lectures and workshops on hands-on procedures with live demonstrations are organized. There are multiple speakers from all over the country who deliver talks and lectures. The younger faculty members are encouraged to conduct lectures and courses during these workshops which provides them with a platform for future conferences. E-poster competitions and trade fairs are also added attractions to this event.
- **Pedovista:** This 2-day event is a National CDE programme which sees participation of post graduate students from all over India. It is an excellent rapid

revision course by senior and experienced faculty members in the view of preparing them for the forthcoming university exams. A plethora of clinical topics are discussed followed by a panel discussion.

- **Surgivista:** The Department of Oral and Maxillofacial conducts hands-on workshops and lectures. The highlight of this vista was that the post graduate students worked on dummy models for better understanding of the procedures. Also, a memorial lecture honoring Late Dr. Sima Mazumdar is organized. A one of its kind debate competition was held for the post graduate students wherein the participants deliberated on the treatment planning for various clinical cases related to "Traumatology" in front of an expert panel of Oral and Maxillofacial Surgeons.
- **Periovista:** This is a regular annual event organized by the Department of Periodontia where a rapid review of the post graduate syllabus is conducted by eminent Professors. Poster and paper competitions are also held for the students. A book on the Living Legends in Periodontology (The Great Works of Andrea Mombelli) written by the faculty members were also released on this platform. Lectures delivered by speakers from all over the country and trade fair are the important highlights of this vista.
- **Orthovista:** This was an exam-oriented post graduate national symposium where participation of the students is seen in large numbers. It comprises of eminent and experienced speakers who compile diverse topics from an exam point of view. Also, latest advances in the field of Orthodontics are discussed by the speakers so that the participants are abreast with current knowledge.
